AYUSH MAHAJAN

Software Engineer | Frontend & Full Stack

Pune, Maharashtra, India | +91 9039898453 | mahajanayush321@gmail.com

linkedin.com/in/am14326 | github.com/mahajanayush28 | ayushmahajan.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building web and mobile applications with React.js, Next.js, React Native, JavaScript, Redux and Node.js. Experienced in reusable UI component libraries, configurable dynamic form builders, RBAC, REST API integration, performance optimisation and Playwright end-to-end testing. Currently building Expense Tracker, a personal finance app with an AI Assistant, and gaining hands-on experience with TypeScript.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript (ES6+), TypeScript (working knowledge, building hands-on experience), Redux, HTML5, CSS3, SASS, Bootstrap, Material UI
Backend & Databases: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, MySQL, Oracle DB
Testing & Tools: Playwright, Git, GitHub, Postman, VS Code, Figma

PROFESSIONAL EXPERIENCE

Software Engineer | MERON

Apr 2025 – Present | Remote

- Developed scalable front-end applications using React.js, Redux and modular architecture principles.
- Built reusable UI components and configurable dynamic form builders, improving development efficiency and consistency across projects.
- Converted Figma designs into responsive, pixel-perfect interfaces with accessibility and cross-browser compatibility.
- Implemented authentication, authorization and role-based access control (RBAC) systems.
- Integrated backend APIs and implemented Playwright automation for end-to-end testing.
- Developed React Native mobile applications and supported deployments in Agile environments.

Software Engineer | VECTOR FLOW

Jan 2023 – Mar 2025 | Remote

- Developed high-performance web applications using React.js and Redux with reusable component libraries.
- Built drag-and-drop form builder solutions and collaborated with cross-functional teams on scalable software products.
- Integrated REST APIs and delivered end-to-end features from design through deployment.
- Optimised application performance and implemented secure authentication and authorization across enterprise applications.

Software Engineer | TECHNO START

Sep 2020 – Oct 2021 | Pune, India

- Designed and implemented application features based on business requirements and user needs.

- Developed responsive user interfaces using HTML, CSS, Bootstrap and JavaScript; collaborated with QA on testing and deployment.

PROJECTS

Expense Tracker: Personal Finance Management App *In Progress*

Tech: React.js, Next.js, Node.js, Express.js, PostgreSQL, Material UI

- Personal finance application to track income and expenses, manage categories and budgets, and review financial activity.
- Building transaction tracking, category management and budget management features.
- Developing an AI Assistant feature to provide smarter financial insights.

Hospital Management System *PG-DAC Final Project*

Tech: MongoDB, Express.js, React.js, Node.js (MERN Stack), HTML, CSS, JavaScript

- Built a system to streamline healthcare administration, enabling efficient handling of patient records, appointments, billing, inventory and reporting.
- Implemented patient registration, record management and appointment scheduling.
- Developed doctor and staff management with role-based access control (RBAC).
- Built billing, payment tracking and inventory/pharmacy management modules.
- Designed the database structure, CRUD operations and administrative reporting modules.

CORE COMPETENCIES

Reusable UI Architecture • Dynamic Form Builders • RBAC & Authentication • REST API Integration • Responsive & Cross-Browser Design • Figma-to-Code • Playwright E2E Testing • React Native • Agile / Remote Delivery

EDUCATION

PG-DAC (Advanced Computing) | **CDAC Bangalore** *Mar 2022 – Sep 2022*

Bachelor of Engineering (B.E.) | **RGPV University, Bhopal** *Jun 2014 – Jun 2019*

KEY STRENGTHS

- Reusable component architecture and scalable front-end design for faster, consistent delivery across projects.
- Strong experience in authentication, authorization and role-based access control across multiple platforms.
- Hands-on end-to-end testing with Playwright, plus debugging, performance tuning and production support.
- Comfortable working with distributed, remote teams in fast-paced Agile environments.
- Clean, maintainable code with a focus on analytical problem solving and end-to-end ownership of features.
